

GermiBAN[®] Mini – Advanced Sterilizer for Modern Spaces by Neoinventronix

Introducing GermiBAN[®] Mini: A revolutionary, patented sterilization device engineered for rapid, **chemical-free disinfection** of air and surfaces in compact and diverse indoor spaces.

Traditional cleaning methods often rely on chemicals and manual effort, which can be time-consuming and insufficient against airborne pathogens. GermiBAN[®] Mini offers a smarter, safer, and more efficient solution.

How GermiBAN[®] Mini Works: Powerful Integration for Pure Environments

GermiBAN[®] Mini uses advanced, proven technologies to sterilize air and surfaces by neutralizing harmful pathogens:

1

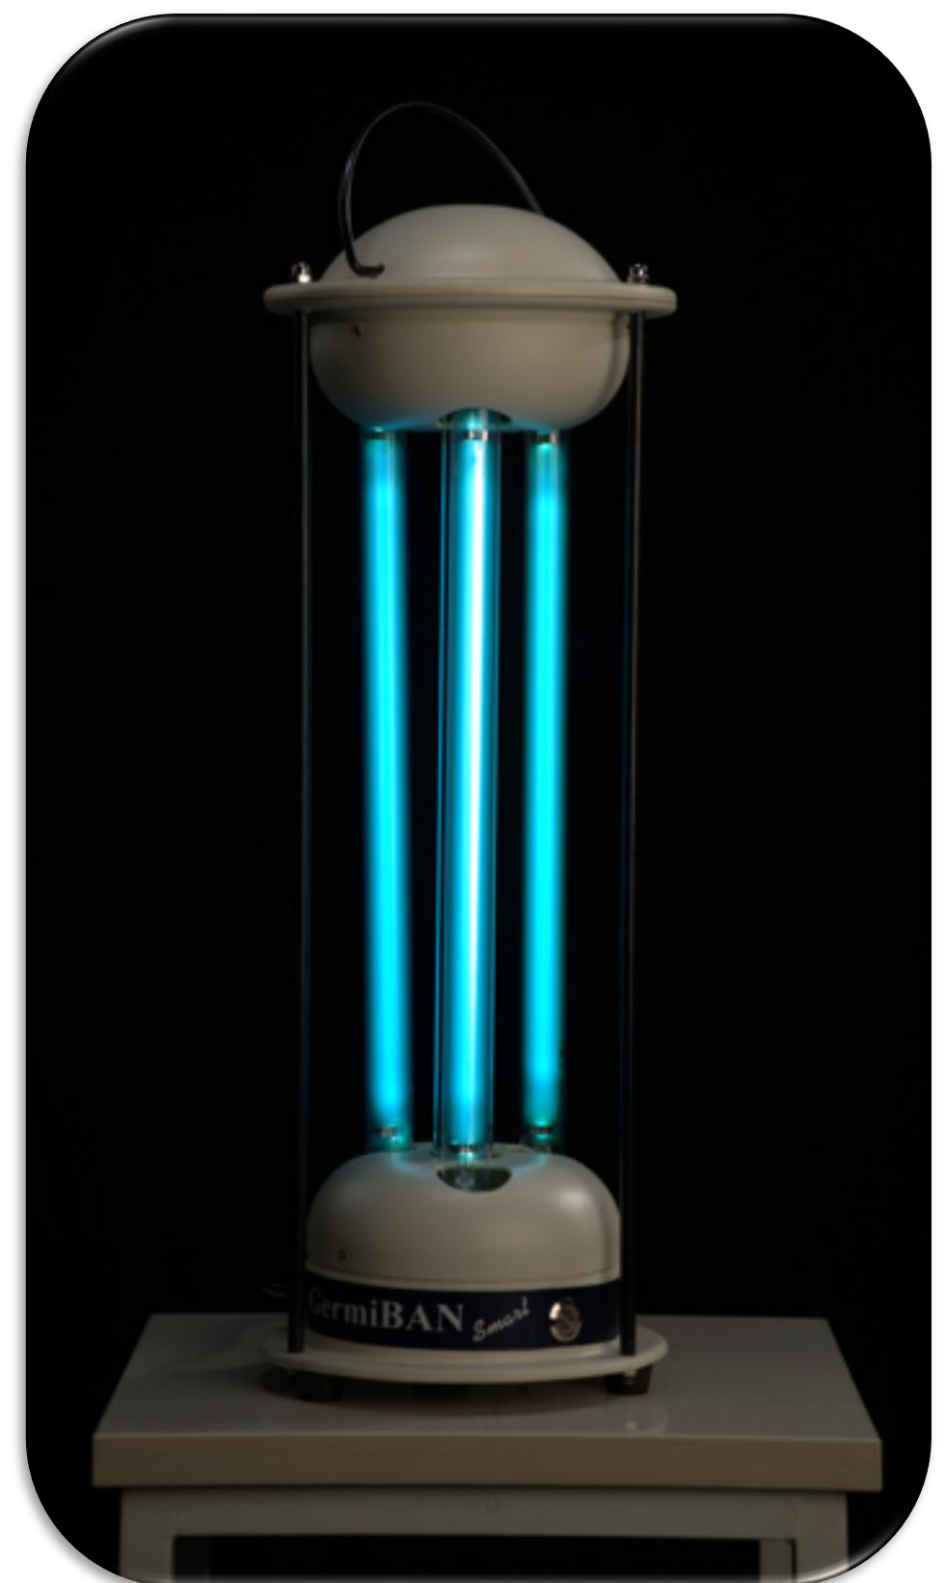

UV-C Sterilization

High-intensity UV-C light (254 nm) deactivates viruses, bacteria, fungi, molds, spores by damaging their DNA/RNA, preventing replication. Effectively disinfects up to 150 sq. ft.

2

Ozonation

Releases ozone at a controlled concentration (20 mg/hr), adhering to OSHA safety standards. Ozone (O₃) permeates areas, oxidizing and neutralizing surface/airborne pathogens, VOCs, odors, and harmful gases.

Key Features & Specifications

- **360° UVC Coverage (254 nm, ~50W):** Triple-lamp design ensures all-around disinfection of surfaces and air.
- **Robust Steel Body:** Durable and stable construction for demanding environments.
- **Ozone purification:** Naturalizes pathogens on surface/ in air, removes VOCs, odors and other harmful gases.
- **Smart Control (Mobile App & Remote):** Seamless operation via Bluetooth-enabled mobile app or remote control.
- **Compact & Lightweight (220 x 620 mm, 4 Kg):** Designed for effortless relocation and placement across rooms.
- **Built-in 360° Microwave Motion Sensor:** Instantly halts UV-C operation upon detecting movement, ensuring user safety.

Neoinventronix

Evolve. Elevate. Enrich.

Tailored Benefits Across Industries

Hospitals & Clinics

Rapid, non-chemical disinfection of patient areas; helps lower healthcare-associated infection (HAI) risks.

Restaurants & Cafeterias

Eliminates airborne germs, reduces food odors, and creates a hygienic dining atmosphere.

Gyms & Fitness Centers

Keeps workout areas fresh and germ-free; supports a cleaner, safer fitness experience.

Schools & Educational Institutions

Reduces spread of airborne illnesses; supports better health and focus for students and staff.

Offices & Commercial Workspaces

Enhances employee well-being, reduces absenteeism, and combats "sick building syndrome."

Hotels & Hospitality

Ensures clean, odor-free rooms and common areas for guests; enhances trust and comfort with visible, effective hygiene solutions.

Fast disinfection, minimal downtime, intuitive operation, and extremely low maintenance.
